

00367 Label v1.0

The Linoprint principle
More than just printing

HEIDELBERG

00368 Label v2.7

Auftrag: 12.000

Constructive dialog
Listening. Asking.
Finding answers.

Powerful due to adaptation. Linoprint is a business segment of Heidelberger Druckmaschinen AG. Our machines rely on the variability of digital printing and provide a high print quality meeting all demands on decorative packaging printing. They run precisely and neatly, integrate into all common packaging processes and are easy to operate. Additional benefit: absolutely reliable function paired with an attractive purchase price and downright cost-efficient operation.

The partnership principle. At the onset, there is the cooperative dialog: we analyze your workflow and your requirements together with you in order to offer a solution that is perfectly matched to your requirements. The final result is a convincing product: a printing system where all elements cooperate optimally – from conveyor to printhead and control software to ink and substrate.

We stay in contact with you even after your system is up and running. And we never stop learning. From you, with you, for you.

your print chal-
lenge to us?

Fivefold first class

The Linoprint principle

Tailor-made modules

Linoprint // Systems Linoprint // Fit Linoprint // Flow Linoprint // Lab Linoprint // Services

Linoprint addresses companies who not only follow their markets' trends but also wish to open up their own free spaces and opportunities – at an appropriate expense and with a positively calculable risk. The Linoprint modules turn your packaging line into an even more efficient, flexible production and logistics asset.

One Linoprint key policy is the transparency of services we offer our customers. You can precisely follow which services we are offering and what your benefits would be. Below, you find an overview of the five sectors representing our range of services. Let us discuss what and how much thereof you want to use!

Linoprint // Systems
Print and Transport Systems. The modular Linoprint system comprises transport and print modules for a large range of 2D and 3D blanks of different materials, each placing its own demands on the processing process. And since top performance of every system relies on perfect interplay, we configure and customize every Linoprint system so it perfectly fulfills its functions.

Linoprint // Fit
Consulting, Planning, Design. We keep close contact with you when planning and designing your Linoprint system as quite a number of requirements and issues only turn up during discussions, and the best solutions are often found in an open dialogue. Our designers and developers keep in contact with you even after commissioning of your Linoprint system – as a flawlessly operating system does not necessarily mean there is no room for improvement.

Linoprint // Flow
Integration and Control Software. The control software offers numerous options and is individually adapted to the functions offered by your printing system – from stand-alone operation to complete integration into your ERP system. All prepress steps can also be integrated so you can process PDF files. A unique feature of all variants: the user interface is very clear, and operation is as easy as can be.

Linoprint // Lab
Matching Ink and Substrate. Ink, material surface and printhead must optimally interact to obtain a high print quality meeting all requirements of your market. To ensure this, the Linoprint Lab analyzes the required print properties and runs extensive tests before recommending a system or a specific ink. By request, we are gladly offering sample prints for your intended print process.

Linoprint // Services
Consumables and Services. The Linoprint efficiency relies last but not least on the excellent quality of after-sales service. Specially trained staff performs on-site maintenance and repairs. And when necessary, we are offering a 24-hour remote service. Apart from spare parts, Heidelberg's World Logistics Center also stocks inks and other consumables to meet even unforeseeable additional demands fast and in a straightforward way.

More than just printing

New possibilities arise from new challenges: instead of offering pre-fabricated solutions for defined tasks, we customize your print system so it exactly matches your specific production requirements. Challenge us – and be prepared for the surprise of how far Linoprint and the Linoprint principle will advance your packaging line!
